PERSONAL TECHNICAL PORTFOLIO Documentation
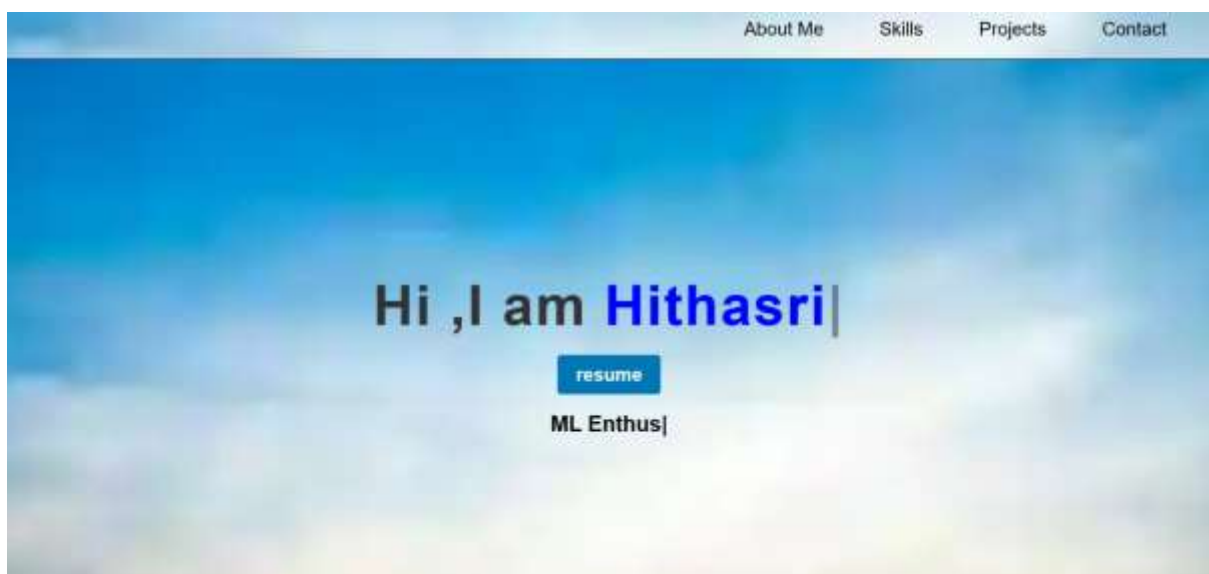

ABSTRACT

This Personal portfolio project is based on Web Development. This is

developed using HTML5, CSS and JS. Code Editor used for this project is

VS Code. It displays the professional background of an individual. It

displays brief information about work experiences till date, education,

skills and contact details along with social media links.

HOME SECTION

It displays name, a button also provided to view the resume. On the top it also has navigation bar which displays other tabs of contact details shortcuts on top right.

ABOUT SECTION

It displays a quick introduction for me. The navigation bar has sticky property which make visible even after scrolling down.

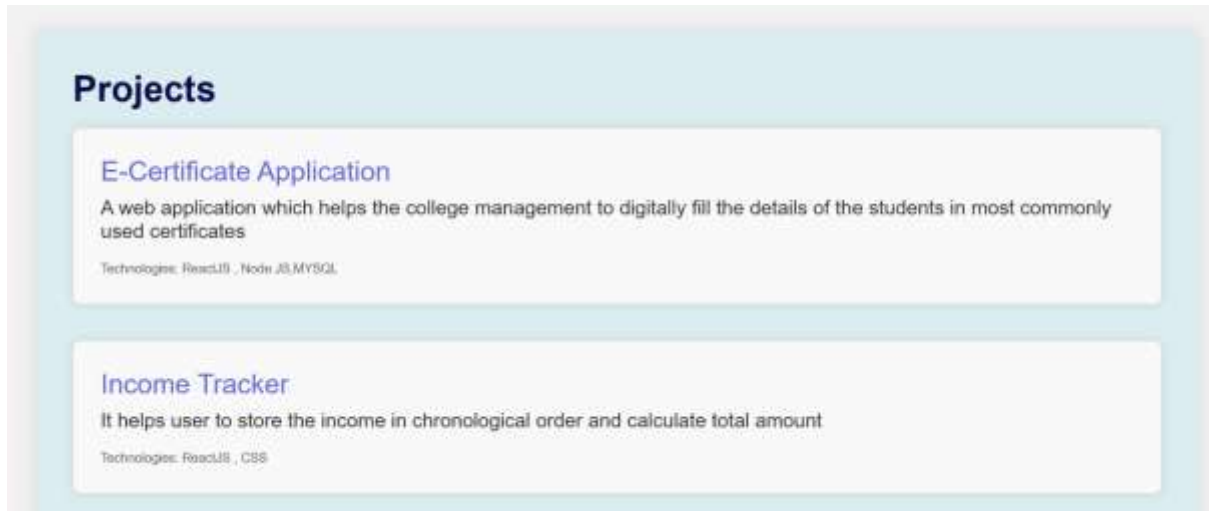

SKILLS SECTION

It displays my technical skills with my proficiency displayed for each technology and my experience.

PROJECTS SECTION

This section displays the projects I worked on including the technologies I used.

CONTACT DETAILS SECTION

This section has the listed below:

- Mail
- LinkedIn
- Call

SOFTWARE USED

Code Editor I used for this project is VS Code. It is used to code complex piece of programs to develop complex projects.

Further technologies used for this project are **HTML5, CSS, BOOTSTRAP and JS.**

CHALLENGES

Challenges faced during this project were:

1. Linking Google drive files like image and documents.
2. Spacing out the elements properly using CSS.
3. Choosing background was a major challenge as it had to be both formal and soothing to eyes.
